NEW

KNAPP®-ADHESIVE ULTRA SPEED

- | elastic joint-filler
- | Solvent-free
- | non-foaming
- | extremely fast reaction time

KNAPP®-ADHESIVE PU+

- | for thin binding joints
- | for fine surfaces
- | water resistant D4-DIN EN 204
- | free from curing agents

KNAPP®-ADHESIVE PM+

- | gap-filling for thick bonding joints
- | low rise foam
- | water resistant D4-DIN EN 204
- | free from curing agents

ULTRA SPEED

Special price from € 6,49/piece

| Artikel-Nr.: | KNAPP®-ADHESIVE ULTRA SPEED (Z074) ULTRA SPEED NEW | KNAPP®-ADHESIVE PU+ (Z011) PU+ | KNAPP®-ADHESIVE PM+ (Z010) PM+ |
|---------------------------------|--|---|--|
| Application | Wide range from furniture to window construction, suitable for fine surfaces and assembly. | Wide range from furniture to window construction, suitable for fine surfaces. | Suitable for assembly and rough surfaces. |
| Advantages | One-component (1K) MS-Polymer mounting adhesive without curing agents and eco-friendly. Easy to handle. Water resistant meets DIN EN204 - D4. | An easy to handle mono component polyurethane adhesive free from curing agents and formaldehyde-free, water resistant meets DIN EN2017 - D4. | An easy to handle mono component polyurethane adhesive, gap-filling, water resistant, formaldehyde-free and meets DIN EN204 - D4. |
| Application instructions | Apply Ultra-Speed on one side, it will no foam during the curing process. Skinning time approx. 6 min, curing time 4mm in 24 hours at +20°, minimum application temperature of 10°, moisture content of wood between 4% to 14%, adhesive testing is recommended. | Apply on one side, it will foam during the curing process. Skinning time is about 10 minutes, functional strength after 20 min, curing time at approx. 24 hours, working temperature minimum +7°, moisture content of wood 8 - 18 %, adhesive testing is recommended. | Apply on one side, it will foam during the curing process. Skinning time is about 7 minutes, functional strength after 20 min, curing time at approx. 24 hours, working temperature minimum +7°, moisture content of wood 8 - 18 %, adhesive testing is recommended. |
| Suitable materials | Glass, mirror (in compliance with DIN EN1306), large range of wood materials, stone, metal, concrete and aerated concrete. By using brick and sand brick the adhesive surface should be pretreated. | Large range of wood materials, all types of plastic, stone, metal and all recommended KNAPP®-connectors. | Wood and building materials, many plastics, stone, ceramic, metal and KNAPP®-connectors, especially the TREPPO (2 or 3 cartridges are needed for 100 drillings). |
| Mounting | General application instructions with the technical and safety data sheets is available to download. | | |

Pre-payment

The goods will be shipped as soon as the invoice amount is paid.

New customers

Payment terms for new customers are pre-payment.

Minimum quantities

If your order falls below a minimum quantity (i.e. smallest packaging unit), a low-quantity-surcharge will be applied. Shipping charges are covered by the customer via pre-payment or direct debit with no discount.

Delivery time By a calendar week

Delivery: Ex works unpacked

Direct debit

The invoiced amount minus 3% skonto discount will be debited from your checking account within 8 business days from the invoice date.

To set up a direct debit, please fill out and sign a „SEPA-Direct-Debit-Mandat“ form. You will receive this form along with the order confirmation.

IMPORTANT: In „forms of payment“ mark the „recurring payment“ option, so the same can be applied to the future orders.

Invoice

Payable within 8 days with a 2 % skonto discount or 14 days with no discount.
